

BEYOND CHATGPT

AI Isn't Magic — it's a super **PATTERN-SPOTTER!**

and YOU can be its BOSS

Beyond ChatGPT: Real-World AI, Innovation & Careers • Bower School of Entrepreneurship • Age 8-12

Tezan Sahu

Your guide for today

Visiting Faculty here!

HI! I'M...

A scientist who teaches AI to be helpful

I build AI at Microsoft

I help make the smart helper inside Office & Copilot

I love big ideas

7 patents, 2 research papers — fancy words for 'new inventions'

I write books & a newsletter

Author of a bestselling book; I teach AI to people online

I've taught 25,000+ people

Kids, students and grown-ups — and today, YOU!

👋 QUICK GAME — HANDS UP IF...

Put your hand up high for everyone that's TRUE for you!

...you've talked to Alexa, Siri or Google

...YouTube somehow knows the next video you'll LOVE

...you've used a filter that puts dog ears on you

...a phone unlocks just by LOOKING at someone's face

Here's the secret...

ALL of that is **A.I.**

Artificial Intelligence — and it's ALREADY all around you

You're not just USING the future... you already live in it.

GAME: REAL or A.I.?

One is REAL. One is made by A.I. Which is which? Vote with your hands!

A

Round 1 · Two FACES

B

(AI-Generated)

(Real)

REAL or A.I.? — keep voting!

Round 2 · Two VOICES

(AI-Generated)

(AI-Generated)

REAL or A.I.? — keep voting!

Round 3 · Two SHORT CLIPS

A

(AI-Generated)

B

(Real)

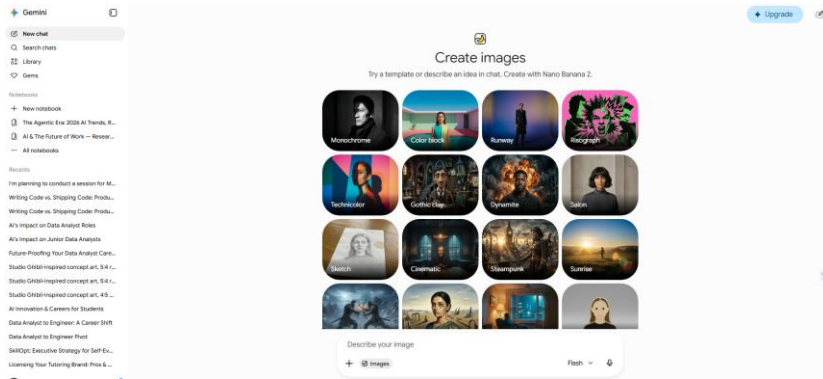

LET'S MAKE SOME MAGIC

AI can create pictures & songs from WORDS

AI that paints ANY picture

Google's "Nano Banana"

Type a silly idea → a picture appears in seconds!

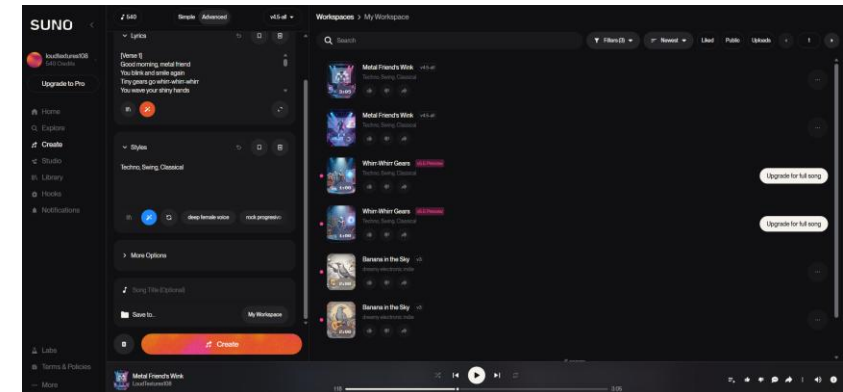

Try: "a banana astronaut riding a skateboard on the moon"

<https://gemini.google.com/app>

AI that makes songs

Suno AI

Type words → out comes a real song with singing!

Try: "a happy birthday song about robots, sung by kids"

suno.com

AI helps people do AMAZING things

Robots that dance & flip

Real robots do backflips & kung-fu!

[Unitree G1 clip ↗](#)

AI helps doctors

Guesses the shape of tiny body parts to invent medicines

[DeepMind AlphaFold ↗](#)

AI helps farmers

Snap a sick plant → AI names the problem & cure

[Plantix app ↗](#)

AI warns of storms

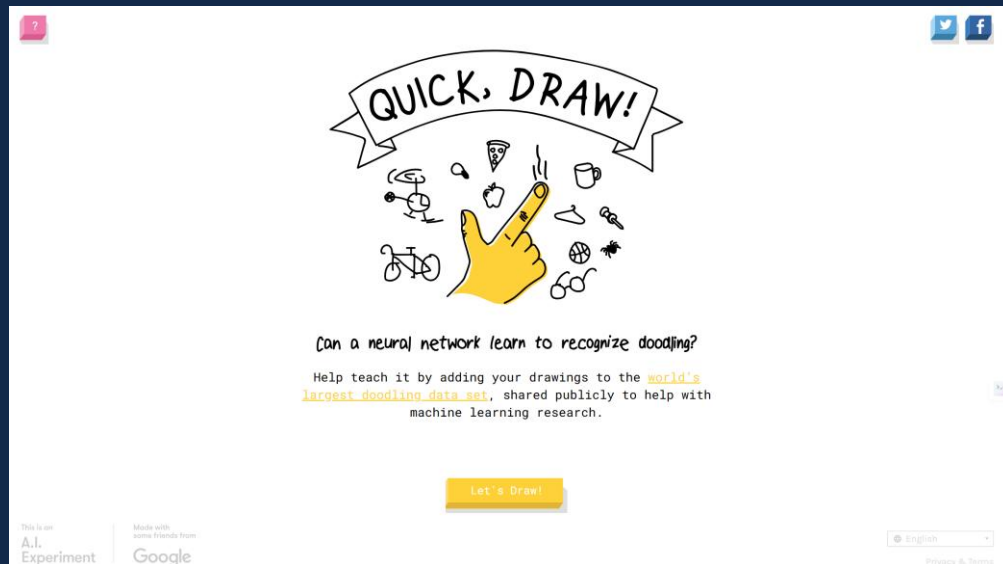

Predicts cyclones days early — keeps people safe

[DeepMind WeatherNext ↗](#)

✨ LIVE MAGIC TIME ✨

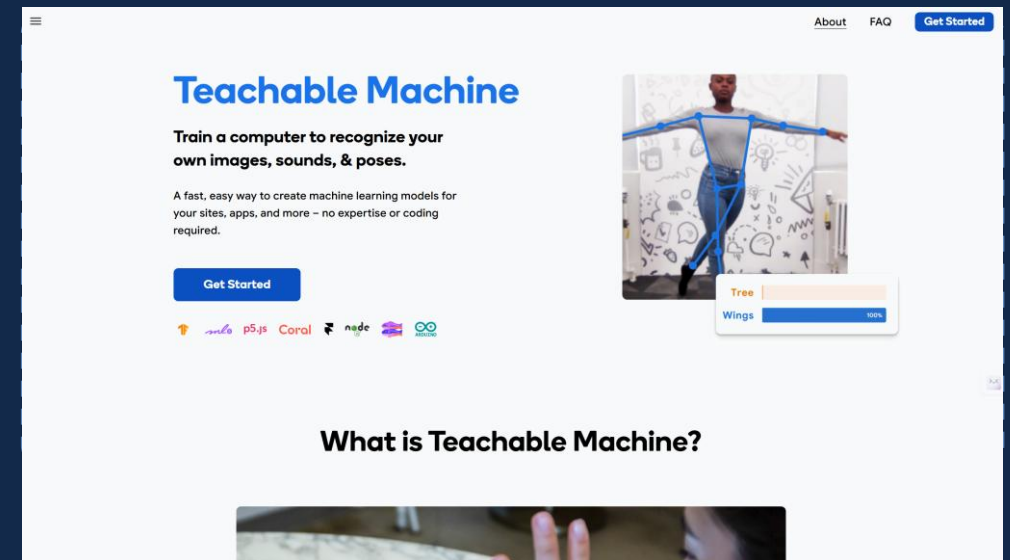

Let's play WITH the AI — right now!

1 Quick, Draw!

I doodle... the AI shouts out what it thinks I'm drawing.
Can it beat YOU?

2 Teachable Machine

We show it Rock, Paper & Scissors a few times each —
then PLAY against it!

How did it learn to do that? Let's find out...

How does AI learn? By spotting PATTERNS!

1. Show it LOTS of examples

We showed the camera lots of
Rock, Paper & Scissors hands

2. It finds the PATTERN

It notices what's the same in all of
them — no one tells it!

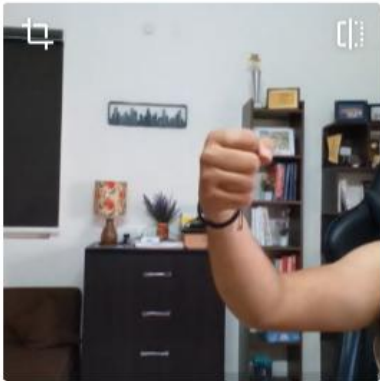

3. Now it can GUESS

Show it something NEW and
it makes a smart guess

Say it with me: "AI learns by... PATTERNS!"

It's not magic — and it can be FOOLED

Now, let's change the hand orientation a bit...

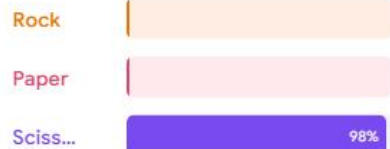

Uh-oh!

We only showed it ONE kind of orientation of the hand — so it gets confused by a new one.

AI only knows what WE showed it.

Output

?

Let's think like inventors:

- 1 Whose fault is it — the robot's, or ours?
- 2 How could we make it SMARTER?

Hint: it's all about the EXAMPLES we give!

The 4-step recipe for ANY AI helper

1 • PROBLEM

What's something annoying?

"I always forget my homework."

2 • WHO

Who needs help?

"Me — and my friends!"

3 • WHAT IT DOES

What would your helper DO?

"Remind me every evening."

4 • OOPS-PLAN

If it makes a mistake?

"Say sorry & ask a grown-up."

Example helper: "HomeworkBuddy" — never forget homework again!

YOUR TURN, FOUNDERS!

Invent your own AI helper

With your partner, fill in the 4 boxes for YOUR helper:

1 • PROBLEM

What bugs you?

2 • WHO

Who needs help?

3 • WHAT IT DOES

What does it do?

4 • OOPS-PLAN

If it's wrong?

Work in pairs — 10 minutes!

Bravest pairs share their helper 

Tell us: “Our helper, _____, fixes _____ for _____, and if it's wrong it _____.”

Remember this forever:

**AI isn't magic and it isn't alive.
It's a super pattern-spotter —
and YOU can be its boss.**

Thank you, future founders! 🚀
